

# TriStar<sup>®</sup> 8.5 SL

## Fast Knockdown in a Lasting Foliar Spray.

Achieve quick knockdown and long-lasting residual control of a wide range of pests with TriStar<sup>®</sup> 8.5 SL insecticide. The odorless, water-based formulation mixes easily and works with contact, systemic and translaminar activity to protect valuable plants. Plus, TriStar 8.5 SL is EPA classified as a reduced risk insecticide, is compatible with many fungicides and miticides, and can be used as an effective resistance management tool. A great alternative where pollination impact is a concern.

### QUICK KNOCKDOWN AND LASTING RESIDUAL CONTROL

- Provides contact, systemic and translaminar activity to penetrate and protect the old and new growth
- Absorbs and spreads within the plant to provide quick knockdown of a wide spectrum of insects (in as little as 15 min. as a direct spray)
- Up to 4 weeks residual control on bedding plants, 4 to 6 weeks on woody ornamentals and trees (depending on the plant material)

### EASY-TO-USE FORMULA

- Excellent tank mix partner
- Compatible with most commonly used fungicides and miticides
- TriStar is odorless and mixes easily with water

### FLEXIBLE USE

- Good IPM and resistance management tool
- EPA classified as a reduced risk insecticide
